

**MAKE YOUR BENDER  
EVEN MORE VERSATILE!!!**

# **EXPANDER OPTION KIT**

**Part #92222**

(This kit retrofits benders from 1993 and newer. For older machines, call for details.)

Installing this kit on your machine will pay-off in efficiency.

With the **EXPANDER OPTION KIT (#H92222)** on your bender, you have doubled the expanding set-up of the machine. The 2<sup>nd</sup> cylinder allows two different expanding systems always available and ready to use, reducing changeover time. Set-up one cylinder for standard expanding from 1-3/8" ID – 4" ID; set up another for 4" ID – 5-1/2" ID or 15/16" ID to 1-1/2" ID.

Or choose to install the Rod Bracket Bender (#H985) on the new cylinder and create hangers and brackets in seconds.
